Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 18 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claims 1-24 are pending in this application. Amended claim 1 and newly added claims 2-24 are noted.

Information Disclosure Statement

The 16-page Information Disclosure Statement dated 6/23/04 submitted after the first office action has been considered.

Specification

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) **if a process, the steps.**

Extensive mechanical and design details of apparatus should not be given.

It is noted that the claimed invention is directed to a method. The examiner suggests amending the abstract to reflect same.

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

It is noted that the claimed invention is directed solely to a method. The examiner suggests amending the title to reflect same.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, the phrase “pushing said substrate” is deemed new matter as there appears to be no support for such a limitation in the original specification. The same issue applies to claims 12-14, 18-19.

In claim 3, the phrase “treating said substantially rigid substrate” is deemed new matter. If the applicant were to amend the limitation to a pretreatment step as recited on p.8 of the

Art Unit: 1762

specification, the examiner will withdraw this part of the rejection. The same issue applies to claims 4, 15, 16.

In claim 4, the phrase “cooling, stacking, and cutting said (substantially rigid) substrate into desired lengths” is deemed new matter.

In claim 5, the terms “non-continuous substrate” and “in series” are deemed new matter. The same issue applies to claim 17.

In claim 6, the phrase heating “to promote a bond with said coating material” is deemed new matter.

In claim 11, the phrase “absence of pigmentation” is deemed new matter. The same issue applies to claim 24.

In claim 14 lines 3-4, the term “substantially uniform cross-sectional profile” is deemed new matter.

In claim 14 lines 6-7, the phrase in which “a second aperture larger than, but conforming to, said first aperture” is deemed new matter.

In claim 17, the phrase “each substrate length having a substantially identical cross-sectional profile” is deemed new matter.

In claim 20, the phrase “applying further comprises coating said substrate” is deemed new matter.
